

Road Freight

Overview

As the leading logistics supplier in South Africa, and one of the largest on the African continent, Imperial expertly manages the movement of goods on behalf of clients, principals and customers between specified sources and destinations, combining different transportation modes and types.

To reduce their time-to-market, improve customer service and mitigate risk, we also work in partnership with clients, principals and customers to integrate logistics functions in their end-to-end supply chain. When the outsource relationship is fully mature, we act as the lead logistics provider (LLP), managing multiple supply chain functions on behalf of our clients, principals and customers. Our core Logistics offerings are Freight Management (Road Freight, Air & Ocean being coordinated by our Lead Logistics Provider capability) and Contract Logistics.

Road Freight offering:

- We supply primary and secondary distribution services by road in South Africa and cross-border, including food, chemicals, fuel and gas, as well as other temperature- and time-sensitive products
- We boast an extensive fleet, coupled with deep expertise in multiple industries
- We focus on integrated solutions that improve real-time, end-to-end visibility
- We are agile and adaptive to changing market demands, optimising resources and extracting synergies across all our capabilities
