DIFC - Dubai, November 29, 2017 -- Moody's Investors Service, ("Moody's") has today placed all the global scale ratings assigned to eight South African corporates under review for downgrade.

Today's rating actions on the eight South African corporates follow the weakening of the South African government's credit profile, as captured by Moody's decision to place the sovereign ratings under review for downgrade on 24 November 2017. For further information, refer to the sovereign press release https://www.moodys.com/research/--PR_375816

Moody's placed the global scale ratings under review from negative of:
- Barloworld Limited
- Fortress REIT Limited
- Hyprop Investments Limited
- Imperial Group Ltd
- Redefine Properties Limited
- Telkom SA SOC Limited
- The Bidvest Group Limited
- Transnet SOC Ltd.

Moody's has taken no action on the following corporate issuers:
- AngloGold Ashanti Limited
- AngloGold Ashanti Holdings plc
- Gold Fields Limited
- Gold Fields Orogen Holding (BVI) Limited
- Naspers Limited
- Myriad International Holdings B.V.
- MTN Group Limited
- MTN (Mauritius) Investments Limited
- Steinhoff International Holdings N.V.
- Steinhoff Investment Holdings Limited
- Steinhoff Europe AG

Ratings at these entities carry some potential exposure to South Africa risk because of their legal domicile. However AngloGold Ashanti Limited, Gold Fields Limited, Naspers Limited and Steinhoff International Holdings N.V. have significant diversification outside South Africa so have the potential to be rated at least one notch above the South African sovereign. We see MTN Group Limited as having less potential to be rated higher than South Africa, but it was downgraded on 13 June 2017 so its rating is currently positioned below South
A full list of affected ratings is provided towards the end of this press release.

RATINGS RATIONALE

The placement of the ratings under review for downgrade reflects the credit linkages of these corporates with the South African economy and their material exposure to the domestic operating environment. The rating under review reflects the uncertainty surrounding political developments and the potential weakening of the country's institutional, economic and fiscal strength that has translated into depressed consumer and business confidence which flows through to lower growth prospects for these corporates. The rating agency expects GDP growth of only 0.5% in 2017 and 1.2% in 2018 from 0.3% in 2016, levels significantly below the government's target growth.

The review will assess the credit implications and potential vulnerabilities in the context of a currently challenging operating environment on each of the issuer's ratings. The impact on all the national scale ratings will also be assessed in the event the government of South Africa's Baa3 local currency bond being downgraded to Ba1.

--CHANGE OF OUTLOOK TO RATING UNDER REVIEW FROM NEGATIVE

BARLOWORLD LIMITED

With close to 81% of revenues from continuing operations derived from South Africa, Barloworld Limited (Barloworld) is intrinsically linked to the macro environment of South Africa. Barloworld is also diversified into the rest of Southern Africa, which contributes 11% to FYE2017 revenues and has operations in Russia (Ba1, stable), which contributes 8% to FYE2017 revenues. This provides some geographic diversification but compared to South Africa Moody's views the risks of operating in Russia as higher, as highlighted by its respective lower sovereign rating.

FORTRESS REIT LIMITED

The review for downgrade on Fortress REIT Limited's (Fortress) global scale ratings reflects its exposure to South Africa, as evidenced by its high operational concentration with approximately 64% of distributable income derived from South Africa as well as 100% access to funding from the South African debt and equity markets. While Fortress has close to half of its asset value in offshore listed REITS (Real Estate Investment Trust), the majority of its revenues and cash flows are derived in South Africa. This in Moody's view is not sufficient to warrant a delinking from the government of South Africa's credit profile.

HYPROP INVESTMENTS LIMITED

The review for downgrade on Hyprop Investments Limited's (Hyprop) global scale issuer ratings reflects its exposure to the risks associated with the economic environment of South Africa given its material operational concentration with 92% of distributable income and 80% of property value (as of 30 June 2017) derived from South Africa. Hyprop's offshore retail exposure into the rest of Africa (currently Ghana, B3, stable), Zambia (B3, negative), Nigeria (B2, stable)) and Central and Eastern Europe (Serbia (Ba3, stable), Montenegro (B1, stable), Macedonia (not rated) and Bulgaria (Baa2, stable)), improves diversification but increases Hyprop's operational risk.

IMPERIAL GROUP LTD

The ratings under review for downgrade reflect Imperial Group Limited's (Imperial or Group) operational concentration in South Africa with 57% of Group revenues and 63% of Group operating profit, exposing the company to the heightened risks associated with South Africa's operating environment. While Imperial's offshore exposure into Africa and Europe is increasing, through acquisitions and higher operating growth, it is not sufficient to fully mitigate against the operational risks faced in South Africa.

REDEFINE PROPERTIES LIMITED

The review for downgrade reflects Redefine Properties Limited's (Redefine) operational concentration to South Africa with 73% of distributable income and 81% of property value (as of 31 August 2017) derived from South Africa. With the weaker credit metrics for the Baa3 rating, the diversification offshore into Poland (A2 stable) and property investments in the United Kingdom and Australia, at this point, are not sufficient to delink.
Redefine's ratings from the government of South Africa's credit profile.

TElkOM SA SOC LIMITED

The global ratings under review reflect Telkom SA SOC Limited's (Telkom or company) 100% operational concentration in South Africa and 39.3% government ownership, exposing the company to the heightened risks associated with the operating environment in South Africa.

Telkom's credit profile continues to balance execution risk around its transformation process of its business model and the low leverage and overall strong credit metrics for the rating category. This offsets to some degree Telkom's operating and competitive challenges in South Africa, as well as the larger capital investments required to deliver on its key strategies for the upcoming years.

THE BIDVEST GROUP LIMITED

The Bidvest Group Limited's (Bidvest or the Group) global issuer ratings under review for downgrade reflects Bidvest's operational concentration in South Africa and exposure to the risks associated with the political, social and economic environment in South Africa. As a service orientated and business focused company, trends in Bidvest's credit profile are correlated to developments in the South African economy, in particular to trends in business sentiment and purchasing patterns, economic growth, and credit markets.

TRANSNET SOC LTD.

The rating under review is driven primarily by the strong credit linkages that exist between the government of South Africa and Transnet SOC Ltd. (Transnet) whereby Transnet's operations have a high correlation to the political, social and economic environment in South Africa. While Transnet is 100% owned by the government of South Africa, it does not benefit from any ratings uplift due to Transnet's standalone credit profile of baa3 (Baseline Credit Assessment (BCA)).

Against the backdrop of Transnet's significant capital expenditure programme, Moody's will continue to closely monitor the impact of current economic conditions on the company, particularly if volumes decelerate or decline. In Moody's view, the key credit factors that will impact Transnet's standalone credit profile over the next few years are the (1) execution of its capital expenditure programme in the context of maintaining conservative financial discipline; (2) potential increase in debt that will be needed to meet the large capital expenditure plans outside of its Market Demand Strategy; and (3) tariffs that Transnet will be able to charge to recover the cost of such increased capital spending. Moody's will also closely monitor the outcome around concerns on historical procurement practices.
