

AT IMPERIAL LOGISTICS

We improve our clients' competitiveness through customising our experience in outsourced value chain management.

Our diverse experience and expansive capabilities extend from procurement to brand activation, and include all the logistics services in between.

We acknowledge that some of our activities may have a detrimental impact on the environment and embraces our Environmental Management Framework and Policy to guide business decisions on environment and sustainability.

# Environmental Policy

## We are committed to

Promote **sustainable development** through due consideration of relevant operational activities and aspects and the expected environmental impacts;

Measure and monitor the impact of our activities on the social and natural environments where we operate and, where necessary, set objectives and targets to **continually improve our performance**;

Create a culture of environmental awareness through ongoing **training, education and information sharing** initiatives;

Where reasonably practicable prevent pollution and comply with all relevant **environmental legislation, international best practice and industry standards**;

Monitor and promote the efficient use of materials and natural resources - including water, energy, and other resources in the value and supply chain through **structured and formalized sustainable development programmes**;

**Monitor and reduce our carbon footprint** through the measurement of our greenhouse gas (GHG) emissions at key operations and major activities;

Communicate Imperial Logistics commitment to **sustainable development** to our clients, customers, contractors and the general public as well as to encourage their support in our initiatives and programmes;
